

FOR IMMEDIATE RELEASE

Novagard Solutions Announces the Introduction of NovaBond® Paintable Hybrid Sealant

CLEVELAND, OH February 6, 2018 – Novagard Solutions®, a manufacturer of premium quality silicone sealants and adhesives, introduces NovaBond® paintable hybrid sealant as an expansion to their broad line of adhesive and sealant product offerings. This newest hybrid sealant product bonds to a wide range of construction materials including: concrete, metals, vinyl, windows and door substrates. NovaBond is easily paintable for interior and exterior applications using a variety of water-based acrylic paints.

NovaBond paintable sealant is an all-weather hybrid sealant that offers superior adhesion and flexibility. NovaBond's proprietary formulation allows the sealant to stay flexible with near zero shrinkage and fast skin-over curing performance.

The sealant performs well in a wide range of temperatures from -30° F to 200°F, while maintaining joint movement capability of +/- 35%, making it ideal for window and door fenestration and similar applications. The sealant is odor free, tack free in 15-25 minutes, and is completely cured and ready to be painted in 2 hours, depending on humidity and temperature.

NovaBond paintable sealant is AAMA verified.

About Novagard Solutions, Inc.

Novagard Solutions, Inc., with a legacy of exceptional quality and customer service for more than 40 years, is a leader in the engineering and manufacturing of premium grade silicone adhesives, sealants and coatings and PVC foam products.
